### **DETAILED ACTION**

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

#### ***Claim Rejections - 35 USC § 102/103***

Claims 57-63 stand rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Nogami of record for reasons of record.

#### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 9-15, 41-55, 57-64, 66-67 stand rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-43 of U.S. Patent No. 6,602,396 in view of Nogami of record for reasons of record.

Claims 9-15, 41-55, 57-64, 66-67 stand rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-11 of U.S. Patent No. 6,693,036 in view of Nogami of record for reasons of record.

Claims 9-15, 41-55, 57-64, 66-67 stand rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-42 of U.S. Patent No. 6,875,335 in view of Nogami of record for reasons of record.

Claims 9-15, 41-55, 57-64, 66-67 stand rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-18 of U.S. Patent No. 6,743,349 in view of Nogami of record for reasons of record.

### ***Response to Arguments***

Applicant's arguments filed 1/22/09 have been fully considered but they are not persuasive.

With respect to claim 57 applicants argue that the Nogami patent fails to disclose that the chucking member can move with respect to the flange portion in an axial direction of the shaft which holds the substrate.

The claims are apparatus claims and patentable distinction is determined by looking at the structural limitations recited in the claim. The Board of Patent Appeals and Interferences in *Ex Parte Masham*, 2 USPQ 2d 1647 (1987) stated, "a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the structural limitations of the claimed." The device "does not undergo a metamorphosis to a new apparatus merely by affixing instructions thereto on the use."

The Nogami patent discloses the structural limitation which is capable of this type of motion if desired (see col. 3, lines 61-63). Accordingly, the claims stand rejected.

With respect to the double patenting rejection, applicants argue that the functional limitations of the claims are not met by the structural limitation of the prior patent. As stated above, the claims are apparatus claims where the functional recitation is given little or no patentable weight. The structure of the prior patent is capable of performing the function recited in the claim and accordingly, the claims are rejected under the doctrine of double patenting.

***Allowable Subject Matter***

Claims 23-34, 36, 38-39, 68-69, 71 are allowed substantially for the reasons contained in the response.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
